SUMMARY

Adaptable professional experienced in fast-paced environments, excelling under pressure and consistently delivering high-quality work at a rapid pace. Thrives on new challenges and demonstrates exceptional interpersonal skills, strong work ethic, and adaptability. Proven ability to work effectively without supervision and quickly acquire new skills.

EDUCATION

Government Pre-University College kundapura
Mangalore Institute of Technology & Engineering

Sep 2020 - April 2022
November 2022 - August 2026

SKILLS

Programming Languages: C, Java, python, Javascript

Web Technologies: HTML5, CSS3, Tailwind CSS, Bootstrap

Frontend Frameworks and Libraries: React.js

Backend Technologies: Node.js, Express.js

Databases: MongoDB, MySQL

Version Control Collaboration: Git, GitHub

Coursework : Data Structure and Algorithms, OOPS, DBMS, Operating System

PROJECTS

Airbnb Replica

[View in GitHub](#)

- Implemented RESTful API principles to create robust routes for the application.
- Utilized Passport.js for secure authentication and authorization in Node.js.
- Leveraged MongoDB for efficient storage and management of user and Listing data.

Guest Accommodation Management System

[View in GitHub](#)

- Designed a web application to streamline guest accommodation processes in a college setting, replacing traditional offline systems.
- Developed the backend using MongoDB to enable effective data storage and retrieval.
- Facilitated a seamless user experience with streamlined functionality.

Game Space with Interactive Games

- Built multiple interactive games using JavaScript to showcase logical thinking and problem-solving skills.
- Designed engaging gameplay mechanics to enhance the user experience.
- Focused on intuitive interfaces and dynamic features for improved user interaction.

Realtime Chatting Application

[View in GitHub](#)

- Developed a React-based real-time chatting application with instantaneous, bidirectional typing feedback between users.
- Implemented WebSocket technology to enable high-speed, seamless communication.
- Ensured dynamic, real-time updates that enhance user interactivity and engagement.

EXPERIENCE

Teaching Assistant | Apna College India | January 2025 – May 2025

- Resolved MERN stack-related doubts and guided over 1,000 students.
- Mentoring students on full-stack development topics, including React, Node.js, MongoDB, and Express.js.
- Supporting the enhancement of students' coding skills and fostering a deeper understanding of web development concepts.

CERTIFICATIONS

- The Complete Oracle SQL Bootcamp (2024)
- RPA Developer Foundation (v2020)
- Postman Classroom Program.
- Prompt Engineering for Everyone, Powered by IBM Developer Skills Network.
